DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1 and 9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 and 9 of copending Application No. 09/773584. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitation of claim 1 and 9 of current application are similar to the copending application No. 09/773584, except the limitation that indicated in the last paragraph of claims 1 and 9, see (last paragraph of the claims 1 and 9), These differences are obvious variations of one other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

As of claims 2, 3, 4 and 5 are broadly disclosed in claims 2, 8, 5 of the copending application (US Application 09773,584). Furthermore, the first timing of stepper motor at the time of pre-scan, and second timing at the time of a main-scan of the film are commonly managed by a processor.

As of claim 6, claims are fully disclosed in claim 6 of the copending application (09/773,584)
